

Equinano

effects to horses:

- an improvement of the general situation and it strengthens tendons, muscles and gristles.
- An optimization of the metabolism of horses and through that, diseases like laminitis, summer eczema, diarrhea and colics can be avoided.
- An improvement of the horn quality in a few months. The hooves get more resilient and the horn gets stronger, more elastic and through that more resistant against abrasion. Better horn quality effects also that horseshoes fit better.

The **Mineralcomplex** (tonic) can be added to the drinking water or can also be given orally. The efficiency of the horse can be reached very fast and can also be kept long-termed. The resilience of tendons and muscles is very necessary for all areas of horse-sports. With products of Equinano performance peaks can be achieved specific and faster. This performance increasing comes not under the doping law.

Re-Balanceoil and Massageoil is perfectly suitable prophylactic before the race and sees a pleasant relaxing and a faster regeneration after the strain.

The Fly and Mosquitospray has a perfect long-termed effect up to 24 hours against flies, insects and all kind of mosquitos. If a horse is trained or ridden the Re-Balanceoil can be used additionally.

Wound healing - Especially on areas with no muscles (such as the tibia) horses have a bad wound healing.
